## BOADZULU ISLAND

Boadzulu Island or Bird Island is the most southern part of Lake Malawi's National Park and part of the World Heritage Site host to the biggest breeding colony of White Breasted Cormorants in Southern Africa. Enjoy a morning or sunset cruise to Boadzulu Island, a place where fish eagles, white-breasted cormorants, and other birds have found a home. No wonder it is also known as Bird Island. Its waters are crystal clear and the presence of the multi coloured mbuna fish provides a surpassing beauty that makes the island an excellent spot for snorkelling and swimming. A morning cruise is more suitable for such activities. Alternatively, explore the island on a sunset cruise which can offer you a peaceful and romantic setting for sundowners. Come and watch the fish eagles feed. Along the shores you'll see the fishing villages overlooking the lake and marvel as the sun sinks on the horizons casting the unquestionable beauty of an African sunset on the calm waters of Lake Malawi. Either trips can be done by speedboat.
